

## **PNA-D4 • Network Audio Amplifier**

## **A&E SPECIFICATIONS**

---

Amplifier shall be capable of being powered directly with PoE+ (802.3at), any product that cannot be powered by PoE+ shall not be accepted.

Amplifier shall be plenum rated (UL2043) for direct installation in a plenum ceiling without an additional enclosure.

Amplifier shall be capable of 20 watts total output at 8-ohms: 5W/channel @ 8-Ohms (20W Total).

Amplifier shall be capable of receiving both Dante™ and AES67 network audio signals.

Amplifier shall be capable of up to 4 discreet channel outputs.

Amplifier shall be stable down to 2-ohm total load impedance.

Amplifier shall provide Euro Bock (3.81mm) output connections.

Amplifier shall contain no moving parts, including cooling fan.

Amplifier shall be capable of network audio (Dante™) channel and routing assignments to be controlled from a variety of third-party manufacturers, supported systems must include Audinate's Dante™ Controller.
